

Notice! This page describes the *nature of the error* using a hypothetical example and not the erroneous data of the input test file. You should however be able to apply this information to your error case.

## General description of the error:

**The format of the error message:** cvc-id.2: There are multiple occurrences of ID value "{0}".

**Error description in schema standard:** <http://www.w3.org/TR/2007/WD-xmlschema11-1-20070830/#cvc-id>

### **Possible causes for this error:**

- There are elements in the schema with attributes containing IDREF ("xsd:IDREF") and ID ("xsd:ID") definitions. This means that for every IDREF-type element there must be a matching ID-type element. *ID-values are unique*. This could possibly require access to the schema to see what elements should be matched.

## An example

```
<amenity>
  <amenityID>ID000000</amenityID>
  <amenityType>String</amenityType>
</amenity>
<amenity>
  <amenityID>ID000000</amenityID>
  <amenityType>String</amenityType>
</amenity>
```

**Error message:** Error cvc-id.2: There are multiple occurrences of ID value 'ID000000'.

**How to fix:** ID-values must be unique so no duplicates are allowed. The error can be corrected by checking that there are no duplicate values.

```
<amenity>  
  <amenityID>ID000000</amenityID>  
  <amenityType>String</amenityType>  
</amenity>  
<amenity>  
  <amenityID>ID000001</amenityID>  
  <amenityType>String</amenityType>  
</amenity>
```
