

Notice! This page describes the *nature of the error* using a hypothetical example and not the erroneous data of the input test file. You should however be able to apply this information to your error case.

General description of the error:

The format of the error message: cvc-type.3.1.2: Element "{0}" is a simple type, so it must have no element information item [children].

Error description in schema standard: <http://www.w3.org/TR/2007/WD-xmlschema11-1-20070830/#cvc-type>

A simple element is an XML element that contains only text. It cannot contain any other elements or attributes.

Possible causes for this error:

- A child element is given for simple type element which can contain only text.

An example

```
<ReqdExctnDt><Date>1967-08-13</Date></ReqdExctnDt>
```

Error message: Error cvc-type.3.1.2: Element 'ReqdExctnDt' is a simple type, so it must have no element information item [children].

How to fix: The reason for this error can be found out by examining the definition of *ReqdExctnDt* from the schema definition and fixing the value to be valid against the definition. In this example child element must be removed under the 'ReqdExctnDt':

```
<ReqdExctnDt>1967-08-13</ReqdExctnDt>
```
