

1. It's recommended to use only one 'Ustrd' element.
2. If CdtrRefInf is used, both Tp and Ref has to be present.
3. Tp/CdOrPrtry/Cd value is mandated to “SCOR”.
4. Strd element is limited to 140 characters in total, including the data and tags. This means that CdtrRefInf is usually the only sensible element to be used in Strd.
