

SEPA

SEPA is Single Euro Payments Area and it aims to create a zone for the euro in which all electronic payments are considered domestic. And where the differences between national and intra-European cross border payments stop to exist. SEPA project aims to improve the efficiency of cross border payments and turn the fragmented national markets for euro payments into a single domestic one: SEPA will enable customers to make cashless euro payments to anyone located anywhere in the area using only a single bank account and a single set of payment instruments.

Schemas

SEPA Credit Transfer Scheme Rulebook v4.1
