

Please note! This page describes the *nature of the error* using a hypothetical example and not the erroneous data of the input test file. You should however be able to apply this information to your error case.

General description of the error:

The format of the error message: XML version \"{0}\" is not supported, only XML 1.0 is supported.

Error description in schema standard: <http://www.w3.org/TR/2004/REC-xml-20...#NT-VersionNum>

Meaning of error: XML version declared in the file is not accepted and file is not considered to be well-formed XML.

Possible causes for this error:

- XML version number is invalid. Only 1.0 is accepted.

Example

```
<?xml version="5000.0" encoding="UTF-8"?>
```

Error message: *Fatal Error VersionNotSupported : XML version "5000.0" is not supported, only XML 1.0 is supported.*

How to fix: Change the version to 1.0

```
<?xml version="1.0" encoding="UTF-8"?>
```
