

## Description of the method

<b>Description:</b>	.toLowerCase() method converts string to lower case.
<b>Available for:</b>	string
<b>Parameters:</b>	-
<b>Return type:</b>	string

## Example

<b>Context:</b>	HeaderType1
<b>OCL:</b>	self.Id.toLowerCase() = "idcontent"
<b>Description:</b>	The example rule converts the value of <Id> element to lower case and compares it to "idcontent".

The XML snippet below would pass this check.

```
<Id>IdContent</Id>
```

The other snippet below however would not pass this check as it contains space between id and content.

```
<Id>Id Content</Id>
```

Attached you can find example schema and files which you can use for testing.
