

Content of the field '<PmtTpInf><SvcLvl><Cd>' (PaymentTypeInformation / ServiceLevel / Code) ' is mandatory.

Only 'SEPA' is allowed as payment type.

Please note that in order to avoid multiple pages containing the same rule information, this wiki page is shared with 3 different rules:

- Case 1, when PmtTpInf is missing
- Case 2, when PmtTpInf is given but PmtInf/SvcLvl is missing:
- Case 3, when PmtTpInf/SvcLvl is given but PmtInf/SvcLvl/Cd is missing

Below is an example of correct use of SvcLvl.

```
<PmtInf>
  <PmtTpInf>
    <SvcLvl>
      <Cd>SEPA</Cd>
    </SvcLvl>
  </PmtTpInf>
</PmtInf>
```
