

Description of the method

Description:	.oclAsType() method returns the given value in the type given as a parameter if its an instance of this type.
Available for:	any
Parameters:	format type
Return type:	the type given as a parameter

Example

Context:	HeaderType1
OCL:	self.Dt.oclAsType(string) = '2018-05-28'
Description:	The example rule checks if the date of <Dt> converted to a string matches the string on the right side of the equation.

The XML snippet below would pass this check.

```
<Dt>2018-05-28</Dt>
```

The other snippet below however would not pass this check.

```
<Dt>2018-06-24</Dt>
```
