

PmtTpInf_NDEA.png

CtgyPurp (CategoryPurpose):

Description:

In salary payments it is required to declare a code here in order to indicate the purpose of the payment is salary.

There are two ways to do this

1. pain.001.001.02/PmtInf/PmtTpInf/CtgyPurp = "SALA"
 2. pain.001.001.02/PmtInf/CdtTrfTxInf/PmtTpInf/CtgyPurp = "SALA"
-

SvcLvl/Prtry (ServiceLevel/Proprietary):

Description:

In Nordea payments this field is used to mark a payment urgent (see example). As with CtgyPurp, the code can be expressed either at debtor (PmtInf) or creditor (CdtTrfTxInf) level.

Example:

```
<PmtTpInf>  
  <SvcLvl>  
    <Prtry>URGP</Prtry>  
  </SvcLvl>  
</PmtTpInf>
```
