

Description of the method

Description:	xmlData method returns all data from element children, with XML-tags stripped out.
Available for:	any
Parameters:	-
Return type:	string

Example

Context:	HeaderType1
OCL:	self.xmlData.contains() = 2015
Description:	The example rule checks whether any element within the header contains value "2015".

The XML snippet below would pass this check.

```

<Header>
  <Id>aId</Id>
  <TimeStamp>2015-07-03T12:17:50</TimeStamp>
  <ControlSum>2</ControlSum>

  <NumberOfTransactions>1</NumberOfTransactions>
</Header>

```

Method xmlData sees the following XML as follows:

aId

2015-07-03T12:17:50

2

1
