

The EPC is the decision-making and coordination body of the European banking industry in relation to payments. The EPC develops the payment schemes and frameworks which help to realise SEPA.

As of now (apr 2014), EPC version 7.0 is the most commonly used by banks, and that version is one of them offered by XMLdation validation service as well.

Following is the CT IG v6.0 in an alternative format, with [AOS elements](#) stripped out

EPC Credit Transfer v6.0 Business Rules
by XMLdata

Certain EPC rules are listed as subpages.

Attached implementation guides:

EPC CT versions 4.0, 5.0, 6.0, 7.0

EPC DD Core versions 4.0, 5.0, 6.0, 7.0

EPC DD B2B versions 2.0, 3.0, 4.0, 5.0
