

The UTF8 character encoding standard must be used in the UNIFI messages. The Latin character set, commonly used in international communication, must be used.

It contains the following characters:

a b c d e f g h i j k l m n o p q r s t u v w x y z
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9
/ - ? : () . , ' +
[Space]

Note: The implementation guide states that the above is about characters that can be used within the tags. For the message itself also other characters (especially < and >) can be used.

Note: Usage may vary depending on bank.
