

ISO 20022 has the following rule regarding PmtTpInf:

- PmtTpInf may not be given in both 'PmtInf' and in 'PmtInf/CdtTrfTxInf' simultaneously

**R1 PaymentTypeInformationRule\***

If PaymentTypeInformation is present at PaymentInformation level, then  
CreditTransferTransactionInformation/PaymentTypeInformation is not allowed.

Below is a screenshot of vanilla pain.001.001.03 schema to potentially help to visualize the situation:

\* Defined as R1 in pain.001.001.03, same rule is present in Direct Debits and other versions of Credit Transfers as well, but with a different R[number]
